Sublimation is the process where the fabric is permanently dyed with a heat process using the highest quality performance fabrics.

### Advantages of sublimation over other methods of printing:

- Images are permanent and do not peel or fade
- Dye does not build up on the fabric
- Sublimated colors are brilliant and color safe since the sublimation process bonds the images to the synthetic fabric
- Truly continuous tones can be achieved that are equivalent to photographs, without the use of special techniques
- Artwork can be printed on the entire garment for a true edge to edge look all for the same low price.
